## Winter Nature Notes

- **December** — After leaves fall, look for Eastern Gray Squirrel dreys—shelters made of balls of leaves in tree branches. Geminid meteors mid-month. Red-bellied woodpeckers and nuthatches store seed in tree bark crevices.
- **January** — First week has Quadrantid meteor shower in Little Dipper. Watch and listen for mixed flocks of overwintering birds — Black-capped Chickadee, Tufted Titmouse, White-breasted Nuthatch and others. Listen for Great Horned Owl pairs calling at night as they begin nesting.
- **February**— Groundhog Day is half-way point between Winter Solstice and Vernal Equinox. Woodpeckers begin drumming and Northern Cardinals begin singing. Skunk mating season. Sap may begin running.

## Summer Nature Notes

- **June** — Dawn chorus of nesting birds wanes over the month. Listen for Red-eyed Vireo and Eastern Wood-Pewee to sing through most of the summer. Coyote pups become active. Dragonflies and damselflies emerging.
- **July** — New antlers on White-tailed Deer buck. Gray Treefrogs calling. Look and listen for Chimney Swifts. Blueberries ripen. Sweet Pepperbush (Summersweet) blooms with fragrance in swamps. Hummingbird Moths flying.
- **August**— Indian Pipes in the woods. Listen and count Snowy Tree Cricket chips (# chirps/13 secs + 40 = temperature in F!) Cicadas calling. Shorebirds migrating back south. Cardinal Flower blooming.

## Spring Nature Notes

- **March** — Skunk Cabbage flowers (if not earlier). Woodcock display flights. Tom Turkeys gobble. Wood Frogs begin to call. Pussy Willows begin showing. Red & Silver Maple flowers.
- **April** — Chickadees, Phoebes, Mourning Doves singing. Mourning Cloak and Eastern Comma emerge and fly. Spring Peepers call. Shadbush and Spicebush bloom. Catbirds, Towhees, Gnatcatchers and Swallows return. Earliest woodland flowers. First warblers arrive.
- **May**— Bumblebee queens flying. Oak catkins flower. Rush of neotropical migrants including orioles, more warblers and tanagers. Painted and Snapping Turtle dig nests. First brood of Eastern Tiger Swallowtail. Dawn chorus at peak by end of the month.

## Fall Nature Notes

- **September** — Watch for Common Nighthawks migrating. Warblers, vireos, tanagers and orioles head south as well. Watch for Broad-winged Hawk flying in swirling “kettles.”
- **October** — Winter sparrows arrive. Witch hazel blooms. Hawk migration continues with Accipiter peak numbers this month. Fall foliage color peaks 2nd half of month. Bufflehead and other wintering ducks arrive.
- **November**— Watch for brown and black caterpillars called Woolly Bears (of the Isabella Tiger Moth). Folklore says more brown, milder winter. Woodpeckers do fall drumming. Horned Larks and Snow Buntings possible. Purple Sandpipers move south along the coast. Leonid meteors 3rd week.

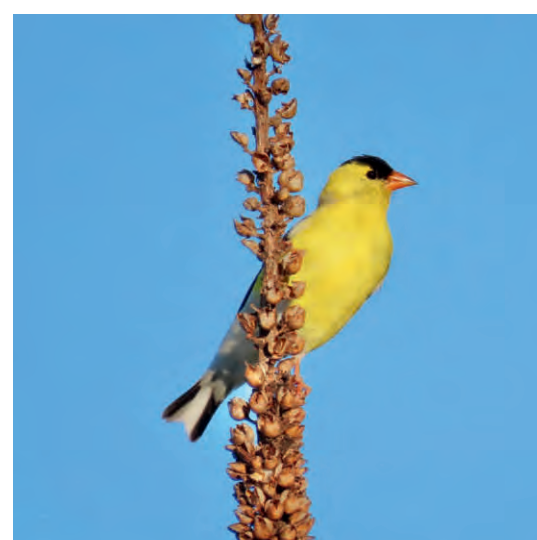

We are a friendly community of people who enjoy exploring the outdoors. Our 1,100+ members are drawn from northwestern Westchester County, New York and beyond. All share a common desire to learn more about birds and other wildlife, and a common belief in the importance of preserving and protecting wildlife habitats. Visit our website to browse through our upcoming events. Join us for a field trip, workshop or community program. Download one of our sanctuary maps and explore a new trail.
