If you choose Sat 9/25 pickup for your order but your plans change, please call our office ASAP, at 914-666-6503.

(This will be a great help to our seed sale volunteers who are staffing these days.)

Bird Seed Types

Sunflower Seed	All forms of sunflower seed attract most birds. The <i>striped</i> generally has larger seeds. The <i>black oil</i> gives the birds more energy and a more consistent smaller seed and thinner shell. The <i>sunflower coarse chips and hearts</i> leave no hull residue.				
Mixed Seed	As in past years, we are offering a customized <i>SMRA mix</i> . The <i>Economy mix</i> may be preferred by those who want to cut down on the sunflower seed to reduce the amount of hulls under a feeder. The <i>No Mess Mix</i> will leave practically no residue because all hulls are removed. The 2021-2022 seed mix percentages are:				
SMRA Custom Mix	10% striped sunflower 25% black oil sunflower 40% white millet 15% cracked corn 5% safflower 5% whole peanuts	SMRA Economy Mix	10% black oil sunflower 45% white millet 45% cracked corn	No Mess Mix <i>also called Hearty Delight</i>	50% sunflower hearts 15% hulled white millet 25% whole peanuts 5% nyjer thistle 5% fine cracked corn
Thistle (Nyjer)	A favorite of goldfinches. A special feeder with small feeding ports or a fine meshed sock is needed.				
Cracked Corn	Attractive for ground feeders like mourning doves, blue jays and sparrows, and squirrels.				
Peanuts	A high energy feed appealing to birds and squirrels.				
Safflower Seed	Noted for <i>not</i> being attractive to squirrels and starlings. Cardinals and chickadees like safflower.				
Suet	Particularly attracts woodpeckers, but also nuthatches, titmice, and chickadees. For this year's sale, we are offering suet mixed with seed.
